### GENERAL THEORY

**GT1**  Global Structure, Singularities and Cosmic Censorship  
*Juan Antonio Valiente Kroon*

**GT2**  Chaos in General Relativity and Cosmology  
*Vahe Gurzadyan*

**GT3**  Einstein-Maxwell Systems  
*Chul Hoon Lee*

**GT4**  Inertial Forces, Rotation, Complex and Twistor Methods in General Relativity  
*Donato Bini*

**GT5**  Wormholes, Energy Conditions and Time Machines  
*T. Roman*

**GT6**  Exact Solutions (mathematical aspects)  
*Alberto Garcia*

**GT7**  Exact Solutions (physical aspects)  
*Susan Scott*

### ALTERNATIVE THEORIES

**AT1**  Alternative Theories (A)  
*Leopold Halpern*

**AT2**  Alternative Theories (B)  
*Richard Hammond*

**AT3**  Multidimensional Gravitational Theories (MGT)  
*Alexander Zhuk*

**AT4**  Metric Affine Gravitational Theories in 4-Dimensions  
*J. G. Pereira*
STRING THEORY

S1 Covariant Quantization
   Nathan Berkovits

S2 AdS/CFT
   Nelson Braga

S3 Brane worlds and cosmology
   Massimo Bianchi and Ruth Durrer

S4 M-theory and Dualities
   Atish Dabholkar

THE QUANTUM AND GRAVITY

QG1 Quantum Gravity Phenomenology
   Giovanni Amelino-Camelia

QG2 Quantum Fields
   Volodia Belinski

QG3 New developments and the time issue in quantum gravity
   Jerzy Kowalski-Glikman

QG4 Casimir effect and short-range gravity
   Vladimir Mostepanenko

QG5 Loop quantum gravity, quantum geometry, spin foams
   Robert Oeckl

QG6 Quantum cosmology and quantum effects in the early Universe
   Paulo Moniz

QG7 Fundamental Issues in Quantum Theory
   Paulo Moniz

BLACK HOLES: THEORY

BHT1 Black Holes from High Energy Collisions
   S. Thomas

BHT2 Perturbations of Collapsed Configurations
   Zoltàn Perjès

BHT3 Analog Models of General Relativity
   Santiago E. Perez Bergliaffa

BHT4 Black Hole Thermodynamics
   J. Zanelli

SELF-GRAVITATING SYSTEMS
SG 1  Self-Gravitating Systems 1
   E. Mielke
SG 2  Self-Gravitating Systems 2
   Simonetta Filippi

COMPUTER METHODS IN GENERAL RELATIVITY

CM  Numerical Relativity, Black Hole Collisions, and Algebraic Computation
    Sascha Husa

PRECISION TESTS OF GENERAL RELATIVITY

PT1  Strong gravity and Gravitational Waves
    Gilles Esposito-Farese
PT2  Precision Gravity Measurements
    Claus Laemmerzahl
PT3  General relativity in space and sensitive tests of the equivalence principle
    Claus Laemmerzahl

GRAVITATIONAL WAVES

GW1  Resonant Detectors of Gravitational Waves: Bars and Spheres
    Odylio Aguiar
GW2  Gravitational Wave Laser Interferometry
    David Blair
GW3  Gravitational Wave Data Analysis
    Fulvio Ricci

THEORETICAL COSMOLOGY

COT1  Topology of the Universe
      Marek Demianski
COT2  Brane-world cosmology
      R. Maartens
COT3  Models of the Early Universe and CMB Anisotropies
      Ruth Durrer
COT4  Inhomogeneous Cosmology
      Andrzej Krasinski
COT5  Nonsingular Cosmology - Inflation
      Mário Novello
COT6  Dark Energy and Universe Acceleration
      Alexei Starobinsky
OBSERVATIONAL COSMOLOGY

COO1 Gravitational Lenses
Philippe Jetzer

COO2 Variable “Constants” of Nature
H. Sandvik

COO3 Galaxies and the Large-Scale Structure
Ravi Sheth

COSMOLOGICAL MICROWAVE BACKGROUND RADIATION

CB Cosmic microwave background radiation and observational cosmology
Alejandro Gangui

ASTROPHYSICS OF NEUTRON STARS AND BLACK HOLES: OBSERVATIONS

APO1 X-Ray Spectroscopy of High Energy Sources with the XMM-Newton Satellite
Elena Pian

APO2 Observations from the Chandra Observatory
N. Schulz

ASTROPHYSICS OF NEUTRON STARS AND BLACK HOLES: THEORY

APT1 Astrophysical Black Holes
Sandip Chakrabarti

APT2 Supermassive Black Holes
Fulvio Melia

APT3 Binary Neutron Stars and General Relativistic Effects in Neutron Stars and Black Holes
M. Mendez

APT4 Spectral and timing appearances of the Galactic and extragalactic Black Holes
Lev Titarchuk

APT5 Radiative Transfer in Relativistic Astrophysics
Roberto Turolla and Silvia Zane

ASTROPARTICLE PHYSICS

AP1 Matter, Dark Matter and CP Violation
Angela Olinto

AP2 Neutrino Physics, Astrophysics and Cosmology
H. Nunokawa, S. Hannestad and E. Nardi
HIGH ENERGY ASTROPHYSICS

HEA1  Astrophysics and Cosmology with Future Ground-Based Gamma Ray Telescopes  
Felix Aharonian

HEA2  Frontiers in Cosmic Rays  
L. Anchordoqui

GAMMA RAY BURSTS: THEORY

GBT1  Inner Engine: Symmetries and Spectra of GRBs  
Pascal Chardonnet

GBT2  The Collapsar and Supranova Models  
Charles Dermer

HISTORY OF RELATIVITY

H1  Einstein Theories: Historical Perspective  
J. EisenstaEdt

THE ORIGINS OF BLACK HOLES AND SUPERNOVAE IN THE EARLY UNIVERSE

EBHSN1  The first stars and GRBs at high redshifts  
George Djorgovski

EBHSN2  The early quasars and their cosmological uses  
George Djorgovski
